

Award Winning Yarra Glen Residence - Client testimonial

Having just bought a beautiful block of land, on a sloping site, we were keen to appoint a designer that was able to make the most of our amazing views and surrounding gardens. After an on-site meeting with the Solar Solutions design team, our first-time-build nerves were relaxed and anticipation of our dream home began.

All considerations in our brief were sufficiently satisfied. With a growing family (having no children prior to the design & now expecting number 3!) separate living zones for work, rest and play were essential. Hearing the numerous possibilities while keeping environmentally sustainable was an exciting place to start, and from there our design project quickly progressed to something tangible. With just one or two minor adjustments to the original design we were happy to sign off and appoint a builder (something else our design team helped with – a professional builder that appreciated accurate & thorough working drawings).

We've since enjoyed almost a year of living in our new home and have hosted many gatherings of friends and family to everyone's delight. A winter enjoyed from the inside warmth while still taking in views of the surrounding countryside, followed by an exceptionally wet spring avoided through the internal garage access; a summer spent by the pool in the alfresco area and currently our first autumn taking in the autumnal colours of the vineyards downhill. We look forward to many more years to come here.

We always appreciate the value of good design and wouldn't hesitate in highly recommending Solar Solutions.
